SUMMARY

Performance-driven Full Stack Developer with 3+ years of experience building and shipping scalable cross-platform mobile and web applications using Flutter, React Native, and React.js / Next.js. Skilled in designing responsive UI/UX, integrating RESTful APIs, and implementing efficient state-management solutions. Experienced in backend development with FastAPI and Spring Boot and database design across PostgreSQL, MySQL, and MS SQL. Strong problem-solving ability with hands-on experience in CI/CD setup, OTA updates, authentication systems, and end-to-end production release to the Google Play Store and Apple App Store. Passionate about building high-performance, user-centric products.

EDUCATION

Bachelor's in Information Technology, Gujarat Technological University 07/2019 – 07/2023
CGPA: 8.96 / 10.0 Ahmedabad, India

EXPERIENCE

Junior Developer, ByPeople Technologies 02/2023 – Present
Ahmedabad, India

A software development company building cross-platform mobile and web solutions for global clients.

- **Contribute to full-stack mobile and web application development** across Flutter, React Native, and React / Next.js.
- Implement UI components and screens following best practices and reusable design patterns.
- Work on API integration and state management using Redux, Provider, and the Context API.
- Debug and optimize application performance and lead production releases to the app stores.

Trainee Developer, Mystudia Education 07/2022 – 08/2022
Ahmedabad, India

An education and visa consultancy helping students pursue international education opportunities.

- **Developed the Mystudia mobile app using Flutter**, enabling students to explore courses, apply for admissions, and track visa processes.
- Built a cross-platform (iOS & Android) solution with Flutter, improving engagement for the consultancy's services.
- Integrated REST APIs for real-time updates on admissions and visa status, enhancing transparency for students.
- Designed an intuitive UI/UX to simplify student onboarding and course selection.

Intern, INFOLABZ IT Services Pvt. Ltd. 06/2022 – 07/2022
Ahmedabad, India

A technology services company specializing in mobile and web app development.

- Gained hands-on experience in Flutter app development.
- Developed and customized UI components for mobile applications.
- Assisted in API integration and state management.
- Performed application debugging and issue resolution.

TECHNICAL SKILLS

Frontend & Mobile Development

Flutter, Dart, React Native, React.js, Next.js, JavaScript, TypeScript, Tailwind CSS

State Management

Provider, Riverpod, GetX, Bloc, Redux, Context API

App Deployment & Publishing

Google Play Store (Play Console), Apple App Store (App Store Connect / TestFlight), OTA release management

DevOps & CI/CD

CodeMagic, CodePush, Docker, Git, GitHub

Backend Development

FastAPI, Python, Spring Boot (basic), RESTful API Development, Spring Data JPA, Hibernate

Databases

PostgreSQL, MySQL, MS SQL

Cloud & Authentication

AWS Amplify, Firebase, JWT Authentication

Tools & Technologies

VS Code, Android Studio, Xcode, Jira, Postman, JasperReports

PROJECTS

AP Invoice Automation — CeliaAssist, (Next.js + React + FastAPI) 01/2026 – Present

- Built a full-stack, multi-tenant Accounts Payable invoice-automation platform that ingests invoices and processes them through an AI (LangGraph) agent workflow with a human-in-the-loop review checkpoint.
- Developed the responsive web UI using Next.js 14, React, and TypeScript with Tailwind CSS — invoice dashboards, 2/3-way matching, approval queues, and Recharts analytics.
- Implemented and integrated FastAPI REST APIs for invoice ingestion, matching, approval, and payment workflows.
- Added real-time status updates over WebSockets and secure authentication (JWT + TOTP 2FA) with role-based access control (RBAC).
- Worked with PostgreSQL, Redis, and Celery async processing in a Dockerized microservices setup; integrated ERP systems (SAP S/4HANA) over the Model Context Protocol (MCP).

Ideel, (Flutter — Web, Android, iOS) 11/2025 – 01/2026

- Led cross-platform upgrade and maintenance of Web, Android, and iOS applications using a unified Flutter codebase.
- Resolved major version-migration issues, ensuring stable production deployments across platforms.
- Configured and automated CI/CD pipelines using CodeMagic, reducing manual build and release effort.
- Implemented CodePush (OTA updates) to enable instant feature rollouts without full app-store releases.
- Developed a secure pre-login authentication system using AWS Amplify, including session and token lifecycle management.
- Designed and optimized onboarding workflows, improving user activation and retention rates.

Nandi Food Inventory, (React.js + Redux) 06/2025 – 11/2025

- Developed a scalable warehouse-management web application for real-time inventory operations.
- Built GRN, GTN, Supplier, and Customer modules, streamlining end-to-end stock workflows.
- Implemented Redux-based state management for efficient real-time stock tracking.
- Designed responsive dashboards and dynamic data tables, ensuring seamless cross-device usability.
- Integrated RESTful APIs for synchronized inventory and transaction data.

Kurudy, (React Native) 04/2025 – 05/2025

- Built a cross-platform tourism-booking mobile application for Android and iOS.
- Developed customer and vendor dashboards, supporting listings, bookings, and management features.
- Integrated secure payment gateways, enabling smooth digital transactions.
- Designed an intuitive UI/UX to enhance user engagement and booking conversion.
- Managed real-time booking updates using optimized API and state-management logic.

SwiftlyIT — ERP System, *(Spring Boot)*

01/2025 – 03/2025

- Contributed as a **Backend Developer** on a Spring Boot-based ERP system.
- Developed and optimized **CRUD modules** for enterprise operations.
- Designed and implemented **RESTful APIs** for seamless frontend-backend communication.
- Improved database performance using **Spring Data JPA, Hibernate, MySQL, and MS SQL**.
- Enhanced system architecture for better scalability and maintainability.

Vehya — Service Pro & Customer Apps, *(Flutter + Native Integration)*

04/2023 – 12/2024

- **Developed and maintained responsive UI for a multi-portal system** (Contractors, Electricians, Apprentices) alongside the customer booking and service-request app.
- Implemented **role-based access control (RBAC)** for workflow and job management.
- Integrated **native Android (Kotlin) & iOS (Swift) modules** for calendar-event synchronization and **Google Maps** for location-based services.
- Implemented **real-time updates using WebSockets and Firebase** for live job and booking status.
- Integrated third-party services including **Onfido (KYC verification)**, secure payments, authentication, and notifications.
- Optimized app performance and ensured seamless API integration across devices.

CrewLair, Social Platform *(Flutter)*

04/2023 – 06/2023

- Designed responsive UI across mobile, tablet, and web platforms using Flutter.
- Developed onboarding and profile-management modules.
- Implemented **interest-based matching logic** for user connections.
- Integrated **Agora for real-time video-calling functionality**.
- Collaborated on REST API integration and performance optimization.
